# Hi-Light®

## Spray Indicator

**Application tips:** Hi-Light® spray indicator is a temporary colorant for marking spray applications. By adding Hi-Light to the spraying system, spray application personnel are able to accurately and uniformly apply pesticides. Hi-Light is compatible with most chemical compounds and is used in applications ranging from broadcasting of soil sterilants to spot treating with brush control products. Hi-Light is easily removed from application equipment and economical to use.

Hi-Light provides the applicator an extremely economical marker for broadcast, backpack sprayer, or general spot application use. Avoid costly misapplication of pesticides by using Hi-Light spray indicator to see where you have been and where you are going.

This product is non-hazardous under OSHA standard 29 CFR1910.1200.

### Suggested use chart

PER 100 GALLONS (380 LITERS) OF SOLUTION

Area to be Applied	Rate
Gravel, bare ground, substations	6 - 12 fl oz (175 - 355 ml)
