

# INTERSTATES 10 AND 75

## FLORIDA

### Florida Department of Transportation District 2 Interstate Asset Maintenance

DBi Services provides comprehensive management, operations and asset maintenance for Interstate 75 from the Marion County line to the Georgia state line and on Interstate 10 from the Nassau County Line to the Jefferson County lines within FDOT District 2.

This project consists of 203.4 centerline miles and features limited access roadways through a mix of rural and metropolitan areas, including the cities of Gainesville and Lake City. It includes NBIS inspections and maintenance of all structures associated with I-75 and I-10 in Alachua, Baker, Columbia, Hamilton, Madison, Nassau and Suwannee Counties.

DBi Services has maintained this project since mid-2013. The contract will continue until 2020, and includes a seven-year renewal option.

#### Project Highlights

DBi Services is responsible to keep these areas attractive and accessible for the public.

DBi Services was a pioneer as the first Asset Management firm to implement the use of Department of Corrections (DOC) officers and inmates for asset maintenance projects in the State of Florida. Five work crews are managed on this project utilizing five DOC officers and 25 inmates, among the largest managed crews in the State.

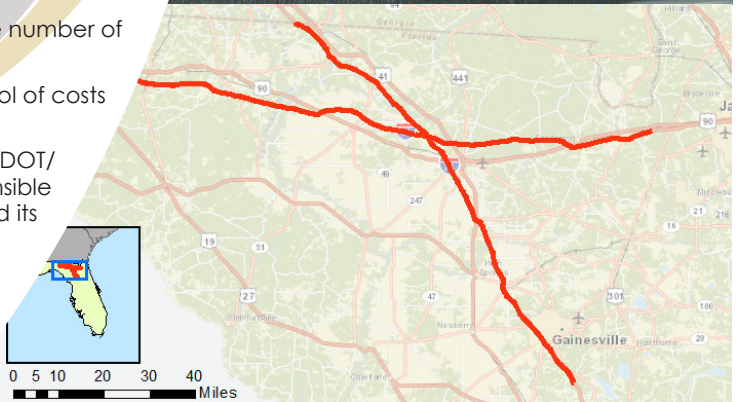

DBi Services is responsible for accident and emergency response throughout the project corridor, including the implementation of One-Way Evacuation Operations in the event of a hurricane or other catastrophic event. This includes coordination of resources working with the FDOT traffic control centers, as well as all police agencies, emergency responders and Traffic Incident Management Systems (TIMS).

#### Relevant Experience Gained

- While most Asset Management projects involve the subcontracting of mowing, DBi Services calculated that it was advantageous on this project to keep mowing services in-house, adding equipment to our fleet to perform these duties.
- Accident rates have decreased since DBi Services has taken on this contract. This can be attributed to our safe work practices and the timely repair of roadways and signage.
- DBi Services handled a significant emergency that required detours for the major intersection of I-10 and I-75. The situation was handled in a timely manner, working with first responders and emergency personnel to clear the situation as quickly as possible to ensure the ease and safety of the traveling public. This cemented our relationships with inter-dependent agencies and first responders.

#### Value to Customer

- Bundled operations and maintenance minimizing the number of contractors and streamlining the oversight needed.
- In-house services, such as mowing, allow direct control of costs and quality.
- DBi Services had a significant leadership role on the FDOT/FHP One-Way Evacuation planning, and were responsible for significant practical improvements to the plan and its implementation.
