

SUDBURY - ONTARIO

Ministry of Transportation Ontario Area Maintenance Contract (AMC)

DBi Services provides comprehensive asset maintenance services in the Sudbury area of Ontario, Canada.

This project consists of 703 centerline miles and 1642 lane miles and includes maintenance of roadways and bridges, winter operations, emergency response, pavement marking and data collection for condition of facilities and assessments of culverts. In addition to routine maintenance of highway lighting, this project also consists of maintenance for 103 traffic signals and 95 flashing beacons.

DBi Services is also responsible for selected capital improvements, unincorporated road work, maintenance/capital improvement of facilities, and operation of movable bridge structures, as well as works hand-in-hand with large scale construction subcontractors.

Project Highlights

DBi Services utilizes and manages 13 Maintenance and Operations yards/facilities throughout the project area.

DBi Services maintains over 700 centerline miles of roadway, including the limited access facility, Highway 69.

Winter operations include the use of over 40 snow plows/spreader units and brand new state-of-the-art tow plows.

All equipment and requirements for timeliness of response are tracked by the DBi Services Automated Vehicle Location (AVL) system, and managed by our in-house Technology Services Group, acting as their own Internet Service Provider.

One of the 100 structures included in this project is the Little Current Swing Bridge, the sole link to the Canadian mainland for the residents of Manitoulin Island.

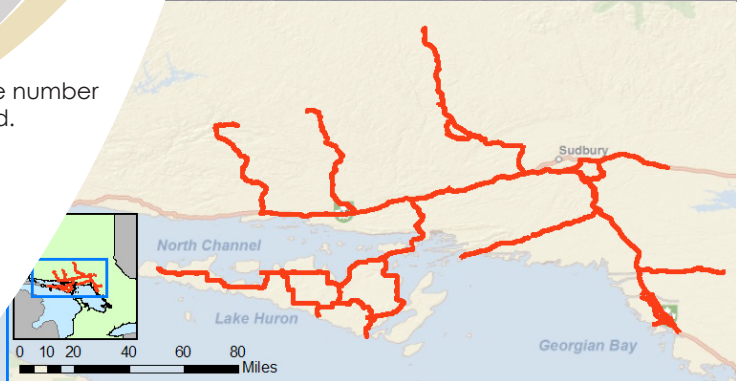

DBi Services is responsible for opening the Little Current Swing Bridge for marine traffic, as well as maintenance of the bridge's electrical and mechanical systems.

Relevant Experience Gained

- Facility arrangement and fleet operations are critical to managing infrastructure on a network in excess of 700 centerline miles. DBi Services gained tremendous experience in managing such a significant network.
- DBi Services strengthened our system of employee development through the addition of features to our new employee outreach program, and hiring of a large number of experienced local employees to our team during mobilization.
- DBi Services further engaged the local subcontracting community and assembled the best team possible to accomplish the project goals.

Value to Customer

- Bundled operations and maintenance minimizing the number of contractors and streamlining the oversight needed.
- Shift of risk to the O&M contractor for performance measures and availability of lanes.
